SAFETY DATA SHEET

Revision 1 Prepared 2024-05-06

Section 1: Identification

Product Code: Product Name: Description: Product Type:

Manufactured by:

P.F.I., Inc. - Paints For Industry 9215 Santa Fe Springs Road Santa Fe Springs, CA 90670 Tel: (562) 946-6666 Fax: (562) 946-4000 Web: www.pfiinc.net 8-AP-1126 Aqualize® Industrial Primer Gray Acrylic Primer / Water-Base Liquid

> Emergency Telephone: PERS 24-Hour Hotline: (800) 633-8253

Section 3: Composition/Information on Ingredients

OSHA/HCS Status:	This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).		
Classification of the Substance:	SKIN CORROSION/IRRITATION - Category 2 SERIOUS EYE DAMAGE/IRRITATION - Category 2A CARCINOGENICITY - Category 2 SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2		
GHS Label Elements Hazard Pictograms:			
Signal Word:	Warning		
Hazard Statements:	 H373 May cause damage to organs through prolonged or repeated exposure H303 May be harmful if swallowed H305 May be harmful if swallowed and enters airways H319 Causes serious eye irritation H332 Harmful if inhaled H335 May cause respiratory irritation 		
Precautionary Statements			
Prevention:	Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Use personal protective equipment as required. Wear protective gloves, eye protection, and face protection. Keep container tightly closed and use only outdoors or in well ventilated areas. Wash hands and any contaminated clothing thoroughly after handling.		
Response:	Seek medical attention if you feel unwell, or are concerned about exposure. If exposed or concerned, seek medical attention.		
Storage & Disposal:	Store in a locked and secure environment. Store in a cool, well ventilated area away from direct sunlight and heat. Dispose of contents and container in accordance with all local, regional, state, and federal regulations.		
Supplemental Label Elements:	Ensure adequate ventilation at all times when using this product and when sanding the dried film. Wear an appropriate, NIOSH approved particulate respirator. Follow all respirator manufacturer's directions for proper use. Abrading or sanding this product's dried film may release crystalline silica which has been shown to cause lung damage and may cause cancer following long term exposure. Product contains solvents which can cause permanent brain and nervous system damage. Intentional misuse by concentrating and inhaling the contents of this product can be harmful or fatal. Do not transfer contents to another container.		
8-AP-1126	Page		
Croy Acrylic Drimor / Water Base			

PROPOSITION 65 WARNING: this product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. FOR INDUSTRIAL USE ONLY.

Hazards not otherwise classified:

None known.

Section 2: Hazard(s) Identification

Section 4: First-Aid Measures

Description of First Aid Measures		
Eye Contact:	Immediately flush eyes with copious amounts of water. Remove any contact lenses Rinse for at least 10 minutes. Get medical attention. Chemical burns must be treate promptly by a physician.	
Inhalation:	Remove victim to fresh air and maintain in a rest position comfortable for breathing. fumes are still present, all rescuers should wear appropriate respirators. If victim exhibits irregular breathing, trained personnel should provide artificial respiration or oxygen. Mouth-to-mouth resuscitation may be dangerous. If necessary, contact a poison control center or physician immediately. If victim is unconscious, place in a recovery position and seek medical help immediately. Maintain an open airway for t victim.	
Skin Contact:	Wash affected areas with soap and water. Remove contaminated clothing and shoes. Continue to rinse the affected area for at least ten minutes. Get medical attention if discomfort continues. Avoid further exposure in the event of any sympto or complaints.	ms
Ingestion:	If product is ingested, contact a poison control center or a physician immediately. D not induce vomitting. Rinse mouth with water and remove dentures, if any. Remove victim to fresh air and keep at rest in a comfortable position to facilitate breathing. If the victim is conscious and the product has been swallowed, provide small quantitie of water to drink. Cease if the victim feels sick, as vomitting may be dangerous. If vomitting occurs, the head should be kept low so that vomit does not enter the lungs. Never administer anything by mouth to an unconscious person. If unconscious, place in a recovery position while medical attention is sought. Maintain an open airway for the victim.	e f es s. ce
Potential Acute Health Effects		
Eye Contact:	Causes serious eye irritation.	
8-AP-1126		Pad

Inhalation:	Can cause central nervous system depression. May cause drowsiness and dizziness as well as respiratory irritation.
Skin Contact:	No known significant effects or critical hazards.
Ingestion:	No known significant effects or critical hazards.
Over-Exposure Signs & Symptoms	
Eye Contact:	Adverse symptoms may include: pain or irritation, watering, redness.
Inhalation:	Adverse symptoms may include: respiratory tract irritation, coughing, nausea or vomiting, headache, drowsiness or fatigue, dizziness or vertigo, unconsciousness.
Skin Contact:	Adverse symptoms may include: irritation, redness.
Ingestion:	Adverse symptoms may include: nausea, vomiting.
Indication of immediate medical at	ention and special treatment needed
Notes to Physician:	Treat symptomatically. Contact poison treatment specialists if large quantities have been ingested or inhaled.
Specific Treatments:	None specified.
Protection of First Aid Providers:	No action should be taken involving any personal risk or without proper training. If fumes are still present, rescuers should wear appropriate respirators or a self contained breathing apparatus. Mouth-to-mouth resuscitation may be dangerous for the first aid provider. Wash all contaminated clothing with soap and water before removal.

Section 5: Fire-Fighting Measures

Extinguishing Media	
Suitable Media:	Use an extinguishing agent suitable for the surrounding fire.
Unsuitable Media:	None known.
Specific Hazards:	In a fire, or if heated, containers may burst due to increased pressure.
Special Firefighting Procedures:	Firefighters should wear appropriate protective equipment and self-contained breathing apparatus with a full face-piece operated in positive pressure mode.

Section 6: Accidental Release Measures

Environmental Precautions:	Avoid dispersal of spilled material and runoff from contacting soil, waterways, drains, and sewers. Inform the relevant authorities if the product has caused environmental pollution.
Steps to be Taken if Material is Released or Spilled:	Contain spilled liquid with sand or earth. Place material in a container and dispose of according to local, regional, state, and federal regulations. Ventilate area and remove product with absorbent.
Small Spills:	Stop leak if doing so can be done without risk. Remove containers from spill area. Dilute with water and mop up if water-soluble. If not water-soluble, absorb with dry material and place in appropriate waste container. Dispose of via a licensed waste disposal contractor.
Large Spills:	Stop leak if doing so can be done without risk. Remove containers from spill area. Prevent entry into sewers, waterways, basements, or confined areas. Wash spillages into an effluent treatment plant or proceed as follows: contain and collect spillage with absorbent materials and place in a container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. See Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7: Handling and Storage

Handling:

Wash thoroughly after handling. Eating, drinking, and smoking should be prohibited in areas where this material is handled, stored, and processed. Wash hands and face before eating or drinking. Remove contaminated clothing and launder before reuse. Use only with adequate ventilation. Follow all SDS and label precautions even after container is emptied, as it may retain product residues. Avoid breathing fumes,

vapors, or mist. Avoid contact with eyes, skin, and clothing.

Storage:

Store in a dry, cool, well ventilated place. Keep container tightly closed while not in use. Isolate from heat, electrical equipment, sparks, and open flame. Do not store above 120 degrees Fahrenheit. Protect from heat, moisture, and foreign materials.

Section 9: Physical and Chemical Properties

Physical State:	Liquid
Odor:	Solvent odor
	Solvent odor
	Liquid
Vapor Density:	Heavier than air
Vapor Density:	4.55
Vapor Pressure:	9.3 mmHg
Evaporation Rate:	Slower than ether
Boiling Point:	171 to 230 °C
Specific Gravity:	1.197
Material VOC (lbs/gal):	0.74
Material VOC (g/L):	88.48
Coating VOC (lbs/gal):	1.45
Coating VOC (g/L):	173.42
Flash Point:	N/A
Autoignition:	Not available
LEL:	N/A
UEL:	N/A
Partition Coefficient, n-octanol/water:	Not available
Auto-ignition temperature:	Not available

Section 10: Stability and Reactivity

Conditions to Avoid: Avoid temperatures above 120 degrees Fahrenheit. Avoid all possible sources of ignition. Do not pressurize, cut, weld, braze, drill, or expose containers to heat. Do not allow vapor to accumulate in low or confined areas. Avoid contact with strong acid and strong bases. By open flame, carbon monoxide, and carbon dioxide. When heated to decomposition, product emits acrid smoke and irritating fumes. Contains solvents which may form carbon monoxide, carbon dioxide, and formaldehyde.

Conditions to Avoid:	Avoid temperatures above 120 degrees Fahrenheit. Avoid contact with strong acid and strong bases.
Incompatibility:	No specific data.
Hazardous Decomposition:	Under normal conditions of storage and use, hazardous decomposition products should not be produced.
Hazardous Polymerization:	Will not occur under normal conditions.
Stability:	The product is stable.

Section 11: Toxicological Information

Effects of Over-Exposure		
Eye Contact:	Causes eye irritation.	
Skin Contact:	Prolonged or repeated skin contact may cause irritation. Allergic reactions are possible.	
Inhalation:	Harmful if inhaled. High gas, vapor, mist, or dust concentrations may be harmful if inhaled. Avoid breathing fumes, spray, vapors, or mist. May cause headaches and dizziness. High vapor concentrations are irritating to the eyes, nose, throat, and lungs. Prolonged or excessive inhalation may cause respiratory tract irritation.	
Ingestion:	May be harmful if swallowed.	
Chronic Hazards:	High concentrations may lead to central nervous system effects (drowsiness, dizziness, nausea, headaches, paralysis, burred vision) and damage. Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Contains carbon black pigment.	
8-AP-1126		Page 5 of

	Chronic inflammation, lung fibrosis, and lung tumors have been observed in experimental tests involving rats exposed to excessive concentrations of carbon black and several insoluble dust particles for long periods of time. Tumors have not been observed in other species under similar circumstances. Epidemiological studies of North American workers show no evidence of clinically significant negative health effects from occupational exposure to carbon black. Carbon black is listed as a Group 2B - Possibly Carcinogenic to Humans, by IARC and is proposed to be listed as A4 - Not Classified as a Human Carcinogen by the American Conference of Governmental Industrial Hygienists. Significant exposure is unlikely during typical application of this product by roller or brush. Risk of overexposure depends on the duration and level of exposure to dust from such processes as repeated sanding of dried surfaces, or inhalation of spray mist, and the actual concentration of carbon black in the product formula.
	Product contains titanium dioxide, which is listed as a Group 2B - Possibly Carcinogenic to Humans by IARC. No significant exposure to titanium dioxide is anticipated while using this product, in which titanium dioxide is bound to other materials including resin and other pigments, during brush or rolling application. Overexposure risks depend on duration and level of exposure to dust, such as from repeated sanding of this product's dried film, or inhalation of spray mist, and the actual concentration of titanium dioxide in the product formula. For additional information, refer to IARC Monograph, Volume 93, 2010.
Primary Routes of Entry:	Eye contact, ingestion, inhalation, absorption through the skin, skin contact.
Acute Toxicity Values:	Acute effects of this product have not been tested. Available data on individual components, if any, will be listed below.

Section 12: Ecological Information

Product is a mixture of listed components.

Ecological Information:

Product is a mixture of listed components.

Section 13: Disposal Considerations

Disposal Considerations: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions, and any by-products should at all times comply with relevant environmental protection regulations and waste disposal regulations, in addition to any local or regional restrictions which may be in effect. Surplus and non-recyclable products should be disposed of via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled whenever possible. Incineration or landfill should only be considered when recycling is not feasible. Take care when handling empty containers as they may retain some residual product. Avoid contact of spilled material with soil, waterways, drains, and sewer systems.

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions, and any by-products should at all times comply with relevant environmental protection regulations and waste disposal regulations, in addition to any local or regional restrictions which may be in effect. Surplus and non-recyclable products should be disposed of via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled whenever possible. Incineration or landfill should only be considered when recycling is not feasible. Take care when handling empty containers as they may retain some residual product. Vapor from residue may create a flammable or explosive atmosphere within the used container . Do not expose empty containers to heat or sparks, and do not weld, cut, or grind used containers unless they have been thoroughly cleaned. Avoid contact of spilled material with soil, waterways, drains, and sewer systems.

Limited Quantity:	-	-	-	-

Special Considerations:

The presence of a shipping description for a particular mode of transport does not indicate that the product is packaged suitably for that mode of transport. All packaging should be reviewed for suitability prior to shipment, so that compliance with applicable regulations can be ensured. Compliance with all applicable regulations is the sole responsibility of the person offering the product for transport. Persons loading and unloading dangerous goods should be trained in all the risks associated with the substances at hand, and on all actions to be taken in case of an emergency situation.
